

NetCore RX2000 Series — Enterprise Router

Vendor Datasheet

Overview

The NetCore RX2000 Series is a rack-mountable enterprise router designed for mid-to-large datacenter and ISP edge deployments. It supports high-throughput routing, hardware-accelerated packet forwarding, and redundant power for high-availability environments. The RX2000 is manufactured by NetCore Systems and is available in three port configurations: RX2000-8, RX2000-16, and RX2000-24.

Hardware Specifications

Specification	Value
Manufacturer	NetCore Systems
Model	RX2000-16
Form Factor	1U Rackmount
Dimensions	44.0 x 43.0 x 4.4 cm
Weight	6.8 kg
CPU	Quad-core 2.2 GHz network processor
Memory (RAM)	8 GB DDR4
Storage	32 GB eMMC (boot/config)
Switching Capacity	320 Gbps
Forwarding Rate	238 Mpps

Port Configuration

The RX2000-16 model provides 16 x 10-Gigabit SFP+ ports and 2 x 100-Gigabit QSFP28 uplink ports. All ports support hot-swappable transceivers. Link aggregation (LACP) is supported across up to 8 ports per group.

Power and Environmental

Attribute	Value
Power Supply	Dual redundant, hot-swappable
Power Draw (typical)	180 W
Power Draw (max)	260 W

Attribute	Value
Input Voltage	100-240V AC, 50/60 Hz
Operating Temperature	0°C to 40°C
Cooling	3 x hot-swappable fan modules, front-to-back airflow

Warranty and Support

The RX2000 Series ships with a standard 3-year limited hardware warranty, covering parts and advance replacement. An optional extended support plan is available for up to 5 years, which adds 24/7 phone support and next business day on-site replacement. List price for the RX2000-16 unit is \$4,250 USD, excluding transceivers and support plans.
